

SATs Facts

- Studying SATs is a valid choice in choosing a career
- SATs give nationally recognised certifications
- While gaining this qualification, apprentices and trainees are paid
- Apprenticeships/ Traineeships teach valuable soft skills which employers are looking for
- It is estimated that 70% of future jobs will call for enterprise skills (FYA, 2017)
- SATs skills accelerate the process of getting full-time employment by half the average time it takes those without (FYA, 2018)

School Community Industry Partnership Service

School-based Apprenticeships and Traineeships (SATs)

SATs help young people go places—whether that's a full-time job, a trade career, university, TAFE or other training.

How do SATs Work?

- SATs combine study, work and training to provide students in years 10, 11 and 12 with a head start on their career.
- Schools and industry work in partnership to give the student one time-tabled 7.5 hour* day a week for paid employment and/or training.
- Students enter a contract with their employer and a registered training organisation (RTO) to provide training and assessment for their SAT.
- It takes up to 2 years to complete a SAT over years 11 and 12, and includes paid days in the workplace.

* 7.5 hours weekly is the average minimum, hours are negotiable with employer

(Queensland Government DEBST, 2019)

SATs Roadmap

Exit Qualifications:

- QCE
- Industry recognised SATs Qualification
